1. Executive Summary

The HR Strategy for Researchers (HRS4R) is an institutional strategy to address the principles of the European Charter for Researchers. For a successful strategy and HRS4R institutional process and communication in alignment with one's overall university strategy, institutions can be awarded with the "HR Excellence in Research Award".

The document InCITIES Project Deliverable D3.2 Specification of HRS4R actions provides an overview of the HRS4R process according to the European Commission (section 3) and helpful tools and practices by TH Koeln (section 4) to be referred to by institutions aiming at engaging in the process.

The final sections of the document (sections 5-8) address steps discussed for each of the InCITIES partner institution. The tables were prepared through bilateral meetings with WP leader of TH Köln and with each consortium partner. Together with the WP leader, members of each institution analysed the current situation regarding the implementation of the 40 principles of Charter and Code at the institution in order to prepare the application for the HR Excellence in Research Award. Project Management, Timeline and Stakeholder involvement were discussed with each institution.

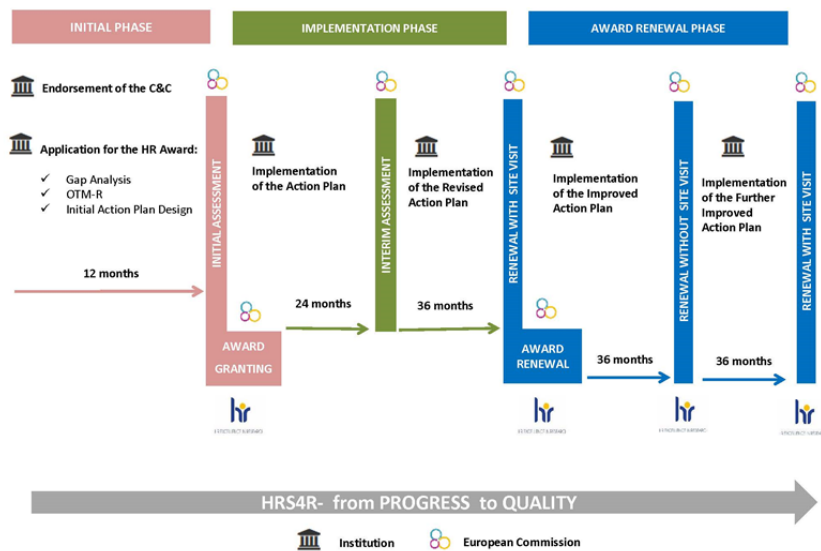

In the next step, the InCITIES institutions will further engage in the process, set up their teams and define the actions more detailed in order to proceed with their HR Excellence in Research applications.

9. Next steps

Applying for the HR Excellence in Research Award is a process and a long-term commitment for each institution. This document states the first steps to be undertaken by the InCITIES institutions working together to benefit from each others' practices. The next steps for each institution in regard to the HRS4R process will be followed according to the timeline. Regular meetings with the WP leader take place with each institution to get feedback and advice regarding the process of their applications for the HR Excellence in Research Award.
